Masters Gallery Foods Plant Expansion

Plymouth, WI, November 2, 2012 – Masters Gallery Foods has announced plans to expand their production and distribution facility based in Plymouth, Wisconsin. Scheduled to break ground at the end of November 2012, the expansion is necessary to support the company's rapid growth and is their second expansion in four years.

Nearly doubling their existing 170,000 square foot facility, the project plans include a new production room along with increased warehousing, dry storage space, and expanded employee welfare areas. The expansion, scheduled to be completed in early 2014, represents a significant investment in the community and is expected to create an additional 50 new jobs over the next several years.

Recently recognized as #20 on Deloitte & Touche's Top 75 list of the top privately held businesses in Wisconsin, Masters Gallery Foods serves many of the nation's grocery chains and foodservice operators with a full line of cheese related products. The company also specializes in the procurement, aging, and distribution of bulk cheeses at a national level.
